

- Got the laptop :D
- Biggest problem is can't add class
- Prepopulate the fillable text fields and they will fill in the rest
- Get rid of add class button
- Display name of class on the page that lists each class for the division
- Add back buttons
- Fix the "Submit" button styling on class page to say "Add"
- Have a page that shows all the riders in a class
- Bertha will check on 4H form to see if it's posted yet
- Show is May 26th
 - Can set up show now
 - Entries will start in May
- Calendar option for date
- Spelling issues with prices for pre registration, etc
- Division Name:
 - Class 1
 - Class 2
- Button in navbar that goes back to the show page & maybe show select button
- Accession # can be alphanumeric, not just a number
- Need to split up address into separate fields (ex.zip, street)
- On new division page, be able to add classes right from that page
- Change the birthdate to be listed in reverse order
- Use the word "scratch" rather than "remove"
- Label
 - Print combo number, and horse rider, and what classes they are in
 - Can use sticker printer and print out each sticker individually
 - **Would need to purchase special printer
- Optional: Print rider name and address on a label to stick on an envelope
- Fix pricing- horse rider combo page
- Preregistration should be yes or no NOT n/A
- Change heading to "Bill for {rider name}" and # combo number
- Improve UI of forms to be more horizontal
- Only pony should be able to have sizes, but not horse
- Input validation
 - Don't allow it to use numbers that don't exist
 -
