- Bertha provided the updated form for registration
  - Birthdate only needed if less than 19
- The team showed Bertha and Rebecca the wireframes that were created
  - For show, would rather have date because show name might be the same, date is the defining feature of the show
  - Owner does not = rider
  - Each rider and horse combo gets their own unique label
  - Add show number to a class, show number unique for just that show
    - Add combos to show by combo number
  - Add horses and riders to DB separately
  - Billing
    - NEW REQUIREMENT: Want a place to keep track of pre-entries, because they are charged less
    - Don't want to freeze an account because they have a balance
    - Field to determine whether they paid with check or cash
    - Field for check number
  - Rider
    - Don't need district, but need county
    - Don't need club name
    - Rider, horse name, county
  - Any random combination number
  - Will only get a combo number for a horse + rider combination
  - On day of show, still assign rider horse combo number
    - For those who are not preregistered, have a quick way to register combo number in a class rather than going all the way back out
    - Delete or add combo number
  - Have a list of who is supposed to be in that class for the gatekeeper
  - NEW REQUIREMENT:Have a table of combo number, rider/horse combo info, and what classes they're in so that you can easily delete/ add
    - Ex. 123- Al(rider) Ruby(horse)
    - For awards, adding/ deleting from class
  - For VHSA, need VHSA number and birthdate if less than 19 years old
  - Add a box for if VHSA
  - For 4H, need to enter county, and birthdate if less than 19 years old
  - Have a checkbox for "VHSA", "4H" or "Other"
  - Don't need Junior or Adult
  - For coggins, need 2 fields of info
    - Coggins Date
    - Accession number
  - Need entry contact information, email/cell number should go on RIDERS or HORSE page
  - Just be able to add a rider
    - Want rider and horse in unique tables, be able to pull up just rider info

- Confirmation when hit "save" to make sure it's been saved
- Add a class outside of the division, add just a class and call it a division
  - If only enter 1 class into division, then that's the name of the class
    - Ex. California Warm-Up
- When the project is done who owns the software, if they need to modify it? DOes UVA own it?
